

ASSIGNMENT 2

• SESSION 10

1. Download a sample SRS (Software Requirements Specification) document for a food delivery app (like Zomato) and perform a peer review by highlighting at least 5 unclear or ambiguous requirements.

Ans.

Peer Review of a Sample SRS

Sample SRS Requirements :-

1. The app shall allow users to search for restaurants.
2. The app shall deliver food quickly.
3. The payment should be secure.
4. Users should receive notifications.
5. The app should have a user-friendly interface.

2. Conduct an informal review of a friend's written test case set for a simple login feature (username and password), and write down 3 suggestions or improvements you would make.

ANS.

Informal Review of Login Test Cases :-

Suggestions/Improvements

1. Add Preconditions :-

Mention that the user account must already be registered and active before testing login.

2. Include Negative Test Cases

Add scenarios for incorrect password, empty username/password, invalid username, and SQL injection attempts.

3. Verify Expected Results Clearly

Instead of writing "Login successful," specify that the user should be redirected to the dashboard/home page and a welcome message should be displayed.

3. Simulate a walkthrough session by explaining the steps of a test case for 'Add to Cart' functionality (like Flipkart) to a classmate and note any questions or feedback they give you.

ANS.

Test Case Steps

Test Case ID :- TC_001

Objective :- Verify that a user can add a product to the shopping cart.

Preconditions:-

- User is logged in.
- Product is available in stock.

Steps :-

1. Open the shopping application.
2. Search for a product.
3. Select the desired product.
4. Click the Add to Cart button.
5. Open the Cart page.
6. Verify that the selected product appears in the cart.

Expected Result :-

- Product is successfully added to the cart.
- Cart count increases by one.
- Product details, quantity, and price are displayed correctly.

Questions/Feedback from Classmate :-

Should the user be logged in before adding an item to the cart?

What happens if the product is out of stock?

4. Identify 4 types of errors or issues that static testing (reviewing documents or code without execution) can catch in a test case document for an online movie booking system (like BookMyShow).

ANS.

Error Type	Example
Missing Requirements.	Test case does not verify seat availability before booking.
Incomplete Test Case	Preconditions such as "User must be logged in" are missing.
Incorrect Expected Result	Expected result says "Payment Successful" even when an invalid card is used.
Inconsistent Steps	Step says "Select a movie" without specifying whether the user should first choose a city
