

ASSIGNMENT 2

• SESSION 4

1. Pick any one app you use daily (like Zomato, Instagram, or Paytm) and list 6 specific testing activities you would perform before its latest feature release. For each activity, write 1 line describing what it checks.

Ans :

App: Zomato 6 Testing Activities Before Latest Feature Release

<u>Testing Activity</u>	<u>What It Checks</u>
Functional Testing	Checks whether the new feature (e.g., “Scheduled Orders”) works as expected end-to-end.
UI Testing	Verifies that buttons, layouts, and screens are correctly displayed across devices.
API Testing	Ensures backend APIs correctly process requests like order placement or coupon application.
Performance Testing	Checks whether the app remains fast under heavy load (many users ordering at once).
Security Testing	Ensures user data, payment details, and login sessions are protected from vulnerabilities.
Regression Testing	Confirms that existing features like search, cart, and payment still work after the new update.

2. Create a responsibility matrix (RACI chart) for a test team working on a new Flipkart-style shopping cart feature. Include at least 4 roles: Tester, Test Leader, Developer, and Product Owner. Assign who is Responsible, Accountable, Consulted, and Informed for each of these activities: Test Planning, Test Case Design, Test Execution, Bug Reporting.

Ans :

RACI Chart — Flipkart-style Shopping Cart Feature

Roles:

- Tester (T)
- Test Leader (TL)
- Developer (D)
- Product Owner (PO)

Activity	Tester	Test Leader	Developer	Product Owner
1. Test Planning	C	A		I
2. Test Case Design	R	A		I
3. Test Execution	R	A		I
4. Bug Reporting	R	A	R	I

Legend:

R = Responsible (does the work)

A = Accountable (final decision owner)

C = Consulted (gives input)

I = Informed (kept updated)

3. Write a brief job description (3-4 lines) for the role of a Test Leader in a team testing a new BookMyShow movie booking feature. Focus on daily responsibilities and decision-making areas.

Ans :

Job Description :- Test Leader (BookMyShow Feature)

A Test Leader for a BookMyShow movie booking feature is responsible for planning the overall testing strategy, assigning tasks to testers, and tracking daily progress. They ensure that critical flows like seat selection,

payment, and ticket generation are properly tested. The Test Leader reviews test cases and defect reports, prioritizes issues based on severity, and coordinates with developers and product owners. They also make the final recommendation on whether the feature is ready for release.

4. Define a list of at least 5 testing activities needed for a small project to add a 'Dark Mode' toggle in a music app like Spotify. For each activity, specify whether it should be done by the Tester or Test Leader. Think about planning, designing, executing, and reviewing tests for this feature.

Ans :

Dark Mode Feature Testing Activities (Spotify-like App)

Testing Activity	Role
1. Requirement Review	Test Leader
2. Test Plan Creation	Test Leader
3. Test Case Design	Tester
4. UI Testing	Tester
5. Compatibility Testing (different devices/themes)	Tester
6. Regression Testing (check normal mode still works)	Tester
7. Test Summary Report & Release Decision	Test Leader
