Task 2: Login Form Validation Testing

Application: Instagram Login

Objective

Verify validation messages for invalid inputs.

Test Cases

TC ID	Test Data	Expected Result	Actual Result	Status
TC_01	Blank Username & Password	Required field validation	Validation displayed	Pass
TC_02	Invalid Email (abc)	Invalid email message	Correct error displayed	Pass
TC_03	Email without @	Validation message	Error displayed	Pass
TC_04	abc@	Invalid email format	Error displayed	Pass
TC_05	Valid Email + Blank Password	Password required	Validation displayed	Pass
TC_06	Valid Email + Wrong Password	Invalid credentials	Proper error displayed	Pass

Validation Observed

- ✓ Required field validation working
- ✓ Invalid email validation working
- ✓ Password validation working
- ✓ Form submission blocked for invalid inputs

Task 3: Notepad++ Installation Testing

Objective

Verify installation and basic functionality.

Installation Steps

- 1) Download installer.
- 2) Launch setup.
- 3) Complete installation.
- 4) Open Start Menu.
- 5) Launch Notepad++.
- 6) Save a text file.

Test Cases

TC ID	Test Scenario	Expected Result	Actual Result	Status
TC_01	Install Notepad++	Installation successful	Installed successfully	Pass
TC_02	Start Menu Shortcut	Shortcut created	Shortcut available	Pass
TC_03	Launch Application	Application opens	Opened successfully	Pass
TC_04	Save Text File	File saved in Documents	File saved successfully	Pass
TC_05	Open Saved File	File opens correctly	Opened successfully	Pass

Task 4: Spotify Lite APK Testing

Platform: Android Emulator (BlueStacks)

Objective

Verify installation and basic UI.

Test Cases

TC ID	Test Scenario	Expected Result	Actual Result	Status
TC_01	Install APK	Installation successful	Installed successfully	Pass
TC_02	Launch App	App should launch	App launched	Pass
TC_03	Login Screen	Login page visible	Displayed correctly	Pass
TC_04	UI Verification	Logo, fields, buttons visible	UI displayed correctly	Pass
TC_05	Screen Responsiveness	No overlapping UI	UI responsive	Pass

Task 5: Windows Calculator Window Handling

Objective

Verify multiple Calculator windows work independently.

Test Cases

TC ID	Test Scenario	Expected Result	Actual Result	Status
TC_01	Open Multiple Calculator Windows	Multiple windows should open	Opened successfully	Pass
TC_02	Perform Calculation in Window 1	Result should be correct	Correct result	Pass
TC_03	Perform Different Calculation in Window 2	Independent calculation	Correct result	Pass
TC_04	Switch Between Windows	No interruption	Working correctly	Pass
TC_05	Verify Independence	One window should not affect another	Independent calculations	Pass

Sample Execution

Window 1: $100 + 200 = 300$

Window 2: $50 \times 5 = 250$
